PROFESSIONAL EXPERIENCE

iCapital (**Hexure**) Jaipur, Rajasthan(Hybrid)

Front End Engineer II Dec 2024-Present

- Focused on frontend development for **FireLight**, a digital sales platform in the insurance domain.
- Developed and enhanced **AI-driven features** such as Common Tag suggestions and Rule Builder integrations, improving system intelligence and user productivity
- Built **NIGO V2** end to end in FireLight, converting **offline paper applications into digital**: carriers and distributors upload PDF annuity applications that load in-app, where agents **annotate**, place **e-signatures** and complete every annuity requirement for in-good-order submission
- Delivered a **CRUD-based application using .NET Core**, implementing scalable APIs and full data lifecycle management
- Contributed to the migration and enhancement of the **React-based New UI**, improving user experience and building reusable, scalable components
- Identified and resolved **critical production and QA defects** related to session handling, validation, rendering, and API failures
- Ensured **cross-environment consistency** (**Dev, QA, UAT, Production**) by validating API endpoints and troubleshooting configuration issues
- Improved system reliability by enhancing **error handling, API integration flow, and UI feedback mechanisms**
- Collaborated with cross-functional teams to support **release cycles, code merges, and environment readiness**
- Applied strong debugging and problem-solving skills to resolve complex issues across frontend and backend integrations

Ohum Healthcare Solutions PVT. LTD. Jaipur, Rajasthan

Technical Consultant (L1) Dec 2022-Dec 2024

- Lead UI Developer at Ohum Healthcare Solution, focused on the frontend development of **Integrated Health Management System**(**IHMS**) web and mobile app of **Rajasthan Government.**
- Created modular, responsive templates using modern **CSS** techniques and **JavaScript** Libraries.
- Understand the architecture of the inhouse javascript framework and develop 2 modules under it.
- Optimize iHMS web app user interface for 2 main devices(Laptop & Tablet) to achieve **responsive UI**.
- Collaborate with java developers to iterate data from backend and manipulate it to show on the frontend side of the application to showcase relevant data in under every module of the application.
- Acquired 40% - 60%proficiency in **React Native** through dedicated training sessions provided by the company.
- Applied newfound skills to independently develop and design multiple screens for a mobile application.

EDUCATION

B.Tech (**2015-2021**) Rajasthan Technical University(Kota)
